Q: Best way to center an icon in an SVG icon I am working on creating a progress bar using an SVG icon. What I currently have is an SVG with two rects and the first rect is centered. I was wondering what the best way to center the first rect in the SVG. #icon { height: 50px; width: 50px; margin: 20px; background: green; position: relative; } #progress{ height: 35px; width: 100%; }
